

# KUDI INU

## *Ecosystem*

*Bringing Crypto closer to real world use...*

**Meet:**  
**KUDI INU**  
**The Money Dog**

**Mission:**

On a journey to bring together like-minded individuals to create one of the strongest meme communities in the Crypto space and also to help rescue endangered dogs that are being raised for food around the world.

# The KUDI INU Token

If you missed Shiba Inu, Saitama, Floki Inu and all the main stream meme coins, then this is your chance to get in early in the next meme coin phenomenal, The Kudi Inu token .

*The meme coin with an extensive ecosystem that are revolutionary in providing cheaper and safer environment for investors and businesses.*

The Kudi Inu team believes that the backbone of every meme coin is its community, that is why we are happy to adopt a new generation of tokenomics that makes use of a referral system designed to help grow the community and go viral. We call this system the Influencer referral program .

## Influencer Referral Program

The influencer referral program will allow influencers and the Kudi Inu community to earn passive income by making videos and other contents about Kudi Inu. All you have to do is generate a unique referral code from our website and share your code alongside the video or content you have created about Kudi Inu to your followers. Every time your followers or subscribers use your code to buy Kudi Inu, you will earn 8% on their initial buy and they will save 5% on taxes.

This innovative tokenomics will help grow the Kudi Inu community as we believe that more influencers will adopt this unique way of earning passively and this will inadvertently encourage them to create more content and promotional videos about The Kudi Inu project.

## What is the Utility?

The Kudi Inu Token is the governance and Utility token built on the Binance Smart Chain for the Kudi Inu Charity and Kudi Ecosystem. It is a hyper-deflationary token, meaning the maximum supply decreases over time by using burn and reward mechanism.

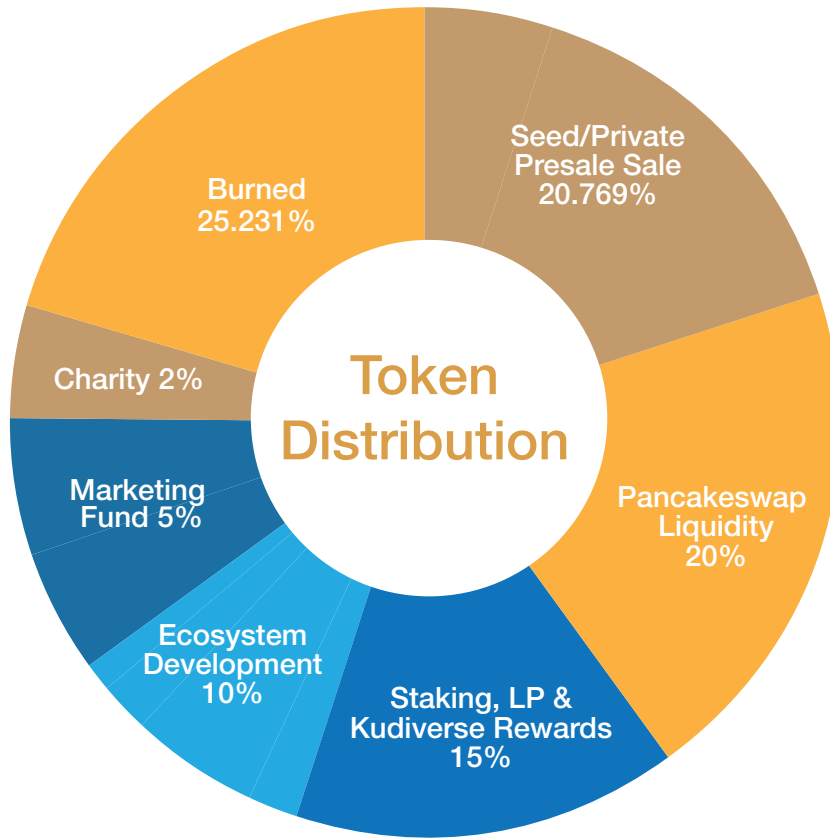

# Tokenomics

The maximum supply will always be

**1,000,000,000,000 KUDI Inu Tokens**

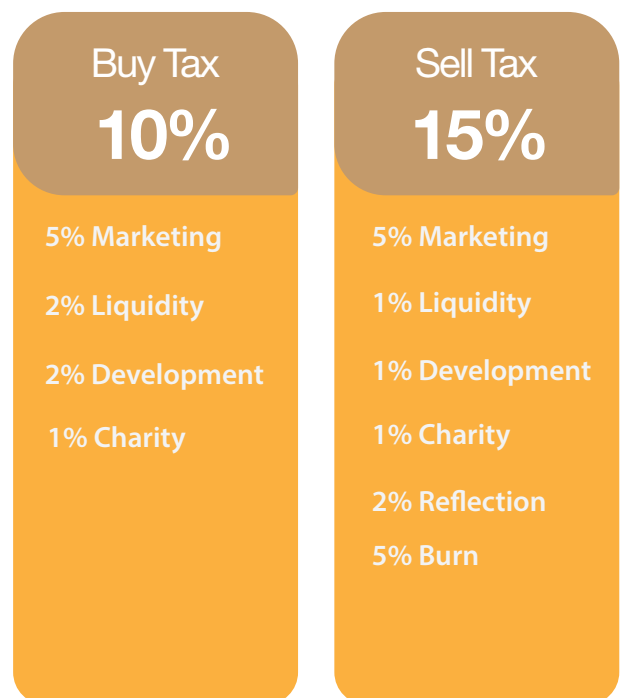

- 20.769% Seed/Private/Presale/airdrop
- 20% Pancakeswap listing
- 15% for Staking, LP and KudiVers rewards (locked until staking platform is live)
- 5% Ecosystem Development (10% released every month)
- 10% for Marketing and Partnerships (10% released every month)
- 2% Team Tokens (locked for 3 months)
- 2% charity tokens
- 25.231% burn of total supply

# Tokenomics Chart

Presale	Same day as Launch	30% first day and 10% very 10 days
Staking and other rewards	30 days after launch	10% every month
Ecosystem Development	30 days after launch	10% first day and 5% very month
Marketing and Partnerships	30 days after launch	10% first day and 5% very month
Team	3 months after launch	5% every month
Charity Tokens	30 days after launch	5% every month

# Features

## Kudi Charity

Kudi Inu charity is an initiative established to help rescue dogs that are being used as delicacies in Africa and some other parts of the world

## Kudi Ecosystem

A co-dependent cross-chain solution, intended to bring DeFi closer to real world use.

# Kudi Charity

Dogs are adorable and intelligent creatures that can be good companions for us humans. They provide social and health benefits to humans. Apart from being instrumental in the security sector studies have shown that dogs help increase happiness, decrease anxiety, decrease the severity of ADHD symptoms, reduce loneliness, improves our moods, decrease anxiety in children and helps lower stress for their owners.

**“The Money Inu rescues endangered dogs that are being raised for food around the world.”**

Unfortunately, these highly intelligent animals are considered as food in Africa and some parts of the world. Our mission is not to deny them of their cravings nor to disparage their beliefs, rather we will partner with dog rescue organisations and offer to buy those dogs from them and find them better homes. We will also work to help rescue abused, injured, hungry and stray dogs.

## Future Partners

# The Kudi Ecosystem

The Kudi Ecosystem is a co-dependent four Platform cross-chain solution, intended to bring DeFi closer to real world use.

**KudiPad:** A multi chain presale launchpad for projects in BSC, ETH and Polygon designed to provide a more safer and cheaper option for projects and investors

KudiSwap

**KudiSwap:** All in one Defi trading tool designed to incorporate all your needs into one platform.

KudiWallet

**KudiWallet:** A multichain app and browser extension wallet that will use atomic swap to enable fast and secure exchange of digital assets. It will work seamlessly with KudiSwap, KudiPay, KudiMarket and third party platforms

KudiMarket

**Kudi Market :** KudiMarket is the next stage in the evolution of NFT marketing place that will allow people to tokenize digital arts and assets as well as tangible assets and items like real estates, companies, cars and so on.

KudiPay

**Kudipay:** A payment and accounting platform that will connect with kudi wallet and Kudi market to help make easy payments and bookkeeping for your business.

# KudiPad

## The Problem

### Investors

Imagine seeing a project (wether on poo coin, Reddit or any other medium), you do your research and then you decide to buy the presale but then on the day of the pre-sale you realize that you bought the wrong token. You wonder how that happened. Well the answer is simple, a group of scammers decided host the same presale on the same launchpad, with the same token name and all other details to make it impossible to differentiate the real one from the fake version.

### Our Solution

We are all about quality not quantity, we believe it is time to make the BSC space great again, to make it a safe environment for every investor. A safe and secured environment will help open up the BSC space to traditional investors that don't compromise on security.

Our KYC although mandatory will be free for every project. One other advantage of our mandatory KYC is that it will help stop reduce projects from scamming investors after they have launched.

### Project owners

One issue most projects face at launch is the immediate dump after price has moved up 2 to 4x. Although most of these sells may be pre-sale investors selling for their 3x. However, there are also launch pads selling huge bags from the 2% tokens they charged as fee for using their platform. This results in a massive dump at launch, killing projects before they even have the chance to grow.

### Our solution

Kudipad will provide a cheaper option for projects to host pre-sales without the fear of a 2% of tokens fee being dumped at the launch. This is because with KudiPad there is no token fee taken as payment to host your presale. However there is a voluntary contribution of a maximum of 1% of presale tokens for our Kudi charity foundation. There is no penalty if you don't contribute.

Tokens from your contributions will be vested with proof of vesting. We believe this will create confidence and transparency with projects owners and help drive more projects to use our platform.

Using KudiPad guarantees free access to our community. There are no charges to host an AMA or to make a post within our socials. We will offer all of these free to any project that will host their presales or private sale on Kudipad.

## Kudi LaunchPad features

### **KYC Verification**

Every project requires a KYC verification before they will be able to host a private/pre-sale on Kudi launchpad

### **Cross-Chain**

KudiPad will be available multiple blockchains including but not limited to Binance smart chain, Ethereum and polygon.

### **Private sale/phase pre-sales**

Projects will be able to host private sales without having to provide liquidity after private sale is done. This means that projects can host multiple phased private/pre-sales.

### **Flexible pre-sales**

This feature allows project owners to finalise their pre-sales even if soft cap is not met, this will give them the opportunity to launch if they choose to do so.

### **Token vesting**

Project owners can use this feature to help them ensure a steady growth in their chart by vesting tokens and releasing them to investors within specific periods of time.

### **Locking**

This feature provides the ability for projects to lock their team tokens and liquidity for transparency and security purposes

# KudiSwap

Kudiswap is Defi tool built to cater for all your needs to become a better Defi trader. With kudiswap you will be able to trade at market price, place limit orders and stop losses while having access to real time charting in one interface.

Kudiswap will be a fully decentralized crypto exchange built on binance smart chain with the ability of bridging your tokens to other blockchains. It will utilize an automated liquidity protocol, that means anyone can provide liquidity with their tokens for trading.

**All in one Defi trading tool designed to incorporate all your needs into one platform.**

## KudiSwap Features

### **Trading market, limit orders and stop losses.**

You have the option not to just swap a token at market price but you can also place limit orders and stop losses. This will give traders more trading power to maximize profits.

## Farming

Farm Kudi Inu token by adding liquidity to the exchange. There are perks when it comes to adding liquidity to kudiSwap, this includes but not limited to; free promotions to our community before launching your project and free ad placement for a week on the KudiSwap platform

## Staking

Stake assets in our liquidity pools and earn a percentage of transaction fees or Kudi Inu token

## Charting

Analyse every token with charting tools to help you make the best trading decisions. View both the chart and swap page on one interface to have real time information before placing a trade.

## Portfolio tracking.

Connect your wallet and track all your assets. KudiSwap makes it easy by giving you all the information about your assets and their value, this together with charting tool will help you analyse which asset is doing better and which one is not.

# KudiMarket

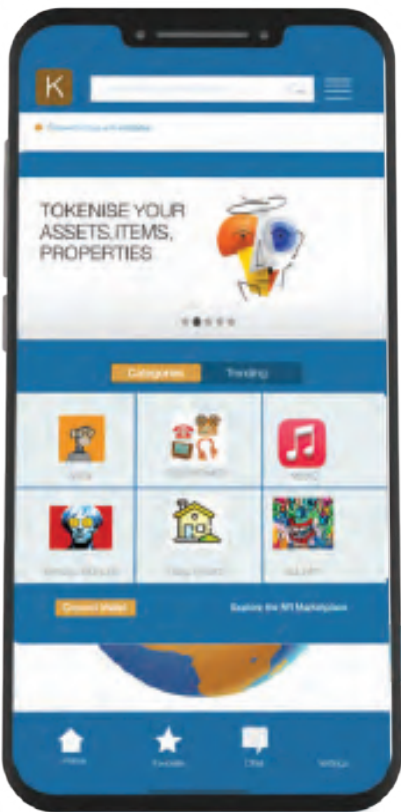

## The next stage in the evolution of NFT marketing place

KudiMarket is the next stage in the evolution of NFT marketing place that will allow people to tokenize digital arts and assets as well as tangible assets and items like real estates, companies, cars and so on.

**“ The goal of KudiMarket is to bring NFT to real world use by allowing people to tokenize any tangible item or asset.**

**”**

### What makes KudiMarket unique?

KudiMarket will utilize a perpetual royalty commission system that will benefit not just the initial owner but also subsequent owners. For instance if person A mints their tangible real estate as a token and sells them on the blockchain to person B, when a print sale is made by person B to person C, the original p ok owner (person A) will receive a royalty commission. Subsequently if person C decides to resell the real estate to person D, person A and B will both benefit from the royalty commission as well as any subsequent owner that buys that real estate.

One tricky thing about tokenizing real world items is the ability to provide a fair system where buyers can actually receive their items in person when they buy from the blockchain. KudiMarket will incorporate escrow feature so anytime you buy a tokenize item your funds will be locked in the contract until you confirm receipt of the item before funds are released to the seller.

# KudiWallet

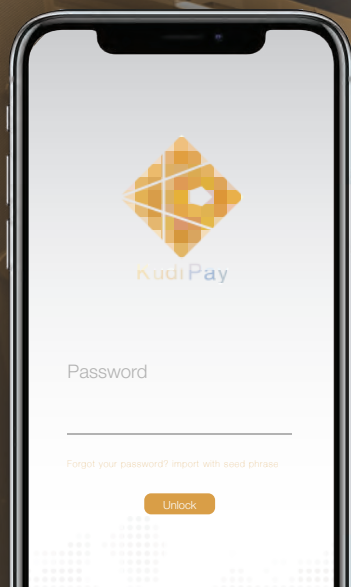

A multichain app and browser extension wallet that will use atomic swap to enable fast and secure exchange of digital assets. It will work seamlessly with KudiSwap, KudiPay and KudiMarket.

## How will it work?

With just a one -click-swap users can send, receive, hodl and swap their token/coins across blockchains.

KudiWallet will use Atomic swap to enable fast and secure exchange of digital assets across blockchains. It is intended to host blockchains like Ethereum, Binance smart Chain, Cosmos, Polkadot, and Tron. More blockchains will be added as time goes on. Users can also connect KudiWallet to Dex, like uniswap, pancakeswap and of course KudiSwap for transactions.

**A payment and accounting platform that will connect with Kudi wallet and Kudi market to help make easy payments and bookkeeping for your business.**

# KudiPay

Kudipay is a Cryptocurrency payment and accounting platform that allows individuals and businesses to make and receive payments, create invoices, send estimates, track expenses and keep the books balanced.

It is a cross-chain platform, which means you can make or receive payments with multiple blockchains. Users can make one time single payment or set-up payroll structure. The denominated currency on kudipay is the kudi Inu token but users can choose to use any cryptocurrency of their choice.

With built in feature like Notifications users will automatically receive reminders of payment made or payment due or a request sent by a customer or client.

Kudipay will also have Escrow feature which will guarantee that your client or customer has put tokens on hold to make payment when the work is done.

To make payments, all you have to do is to connect kudipay to Kudiwallet, transfer the funds and generate receipt to keep records of payments.

Kudipay will work seamlessly with Kudi wallet and Kudi Market for quick and easy payments and accounting Kudi pay is free to use but users will have to have certain amount of Kudiswap tokens in their wallet to unlock certain features like Payrolls. The token amount will be determined by a community vote.

# KudiPay features

## Single Payment

Make single payments with kudipay and automatically generate a receipt for record keeping.

## Invoicing

You can select from our range of professionally designed templates.

When you send out an invoice, the app will mark it as a payment due so you can change it to payment made once you receive payment.

## Recurring invoices

Automate your invoices on specific schedules that work for you and your customers. Customize your schedule so your customers get your invoices exactly when you want them to.

## Customers

Create or save a list of customers you have already or yet to receive or make payment to with their corresponding addresses for easy future transactions

## Receipts

Generate receipt for your clients or customers upon request or set it to automatically send receipts on every payment you receive

## Payrolls

Create a Payroll list of your employees and with the escrow feature you can put in cryptocurrencies set the date and time for payments to be transferred to employees. This will encourage your workers to be more efficient once they see that their salary is pending even before the due time.

# Roadmap

Join us on our Journey to Andromeda Galaxy

Preparing to take-off

## Phase 1

- ✓ Idea Development
- ✓ Team Formation
- ✓ Smart contract development
- ✓ Community Engagemen

Journey to Andromeda

## Phase 2

- ✓ Smart Contract Audit
- ✓ Presale
- ✓ Pre-launch Marketing
- ✓ Pancake swap launch
- ✓ Post-launch Marketing
- ✓ Staking platform

Adromeda Galaxy

## Phase 3

- ✓ Bridge to other blockchains
- ✓ Influencer Partnerships
- ✓ KudiPad testnet and launch on BSC
- ✓ Kudiswap testnet and launch on BSC
- ✓ Charity donation
- ✓ CEX listings

Exploring other Galaxies

## Phase 4

- ✓ KudiMarket testnet and launch
- ✓ KudiPay Testnet and launch
- ✓ Partnerships with companies, businesses and vendors
- ✓ KudiWallet Testnet and launch
- ✓ KudiWallet integration with third-party Dex, online shops and payment platforms
- ✓ Integration of Entire Ecosystem
- ✓ KudiVers development
